

EXPERIMENTAL ARCHAEOLOGY AND EARLY MODERN HISTORY

Workshop organised by Dr. Eva Andersson Strand and Dr. Paula Hohti

Wednesday, 18 February 2015,

Centre for Textile Research, University of Copenhagen

Experimental archaeology is often used as method in prehistoric archaeology. Especially in textile research the results are used quite frequently. We will ask can experiments also be used in medieval and early modern studies? And in that case what type of tests would be relevant?

We will

- Investigate some of the previous experiments carried by participants
- Do new experiments
- Discuss visual images of textile tools and crafts
- Examine historical written instructions and recipes
